

Mission-critical outcomes, delivered on time.

A cleared engineering firm delivering software, systems integration, and geospatial data services to federal and intelligence customers.

UEI TN9HXYWM3QB3 · CAGE 68BE1 · SMALL DISADVANTAGED BUSINESS · VIRGINIA DBE CERTIFIED · SAM ACTIVE

CORE COMPETENCIES

Geospatial & data engineering

GEOINT production support, data stewardship, and enterprise geospatial migration. Large-scale geospatial data and GeoDatabase migration with dataset extraction across enterprise systems, compliance validation, and automated conversion tooling for GEOINT data integration. Operational dashboards for production status, data quality, and migration progress.

Software development & systems integration

Full-stack development and data architecture for mission systems, from prototype through sustainment. Vue 3 / TypeScript, Python, Java and Spring Boot, Node.js, REST APIs, Elasticsearch, and MySQL, with security integration across PKI, TLS 1.2, multi-factor authentication, and LDAP.

Cleared delivery

We source, vet, and carry senior talent on federal and intelligence programs. Every placement is a W-2 employee with benefits. We screen clearance status, poly, and technical fit before a resume reaches you — which is why our submissions convert.

PAST PERFORMANCE

We deliver to Department of Defense and intelligence community programs, supporting geospatial production, data stewardship, and mission software — at customer sites in Virginia, Missouri, Maryland, and North Carolina. We work as a subcontractor to primes and as a prime on direct awards, across all three service areas above.

NAICS CODES

541512 Computer Systems Design **PRIMARY**
541511 Custom Computer Programming Services
541519 Other Computer Related Services
541513 Computer Facilities Management
541690 Other Scientific & Technical Consulting
541618 Other Management Consulting Services

PSC CODES

DA01 Business Application Development (Labor)
