

Java Developer — Data Ingestion

Hanover, MD (on-site) | Active TS/SCI with Full Scope Polygraph required | Full-time, W-2 with benefits

Technology On Time, Inc. (TnT) is hiring a **Java Developer** in Hanover, MD to join a small three-person team tackling difficult data ingestion problems for a national intelligence customer. The data arrives from varied sources in varied formats and does not cooperate; your job is to make it usable. Signals analysis or DSP background is a significant differentiator here.

Required Qualifications

- Active TS/SCI clearance with a current Full Scope Polygraph. This is a hard requirement; candidates without an in-scope FS Poly cannot be considered.
- 4 to 7 years of professional Java development experience.
- Experience building data ingestion, parsing, or transformation pipelines across multiple source types and formats.
- Ability to troubleshoot malformed, inconsistent, or poorly documented data sources.
- Ability to work effectively on a small team with shared ownership of a difficult problem.

Desired

- Experience or exposure to signals analysis or digital signal processing (DSP) — a large plus for this billet.
- Experience with streaming or message-based ingest frameworks.

Technology On Time, Inc. is a minority-owned small business delivering cleared engineering, software, and geospatial talent to the Intelligence Community and Department of Defense. To apply, send a current resume to info@techontime.com. TnT is an Equal Opportunity Employer; all qualified applicants receive consideration without regard to any legally protected status.
