

Senior Software Engineer — Splunk / Big Data

Hanover, MD (on-site) | Active TS/SCI with Full Scope Polygraph required | Full-time, W-2 with benefits

Technology On Time, Inc. (TnT) is hiring a **Senior Software Engineer** in Hanover, MD for a Splunk-based project supporting a national intelligence customer. This is a top-of-scale billet for an engineer with two decades of delivery behind them — someone who can shape technical direction on a large-scale data platform, not just work tickets on it.

Required Qualifications

- Active TS/SCI clearance with a current Full Scope Polygraph. This is a hard requirement; candidates without an in-scope FS Poly cannot be considered.
- 19+ years of professional experience as a software developer.
- Substantial experience with large-scale or big data platforms, including data ingest, indexing, search, and analytic delivery.
- Demonstrated ability to operate independently and provide technical leadership on a complex project.
- Strong written and verbal communication skills, including the ability to explain technical tradeoffs to non-technical stakeholders.

Desired

- Direct Splunk experience — development, dashboarding, SPL, app or add-on development, or platform administration.
- Experience with comparable big data ecosystems (Elastic, Hadoop, Kafka, Spark, NiFi) where Splunk experience is not present.

Technology On Time, Inc. is a minority-owned small business delivering cleared engineering, software, and geospatial talent to the Intelligence Community and Department of Defense. To apply, send a current resume to info@techontime.com. TnT is an Equal Opportunity Employer; all qualified applicants receive consideration without regard to any legally protected status.
