

Software Engineer — Java / RESTful Services

Hanover, MD (on-site) | Active TS/SCI with Full Scope Polygraph required | Full-time, W-2 with benefits

Technology On Time, Inc. (TnT) is hiring a **Java Software Engineer** in Hanover, MD to build and sustain service-oriented capabilities for a national intelligence customer. The center of gravity for this role is RESTful service design and implementation — clean interfaces that other teams can build against reliably.

Required Qualifications

- Active TS/SCI clearance with a current Full Scope Polygraph. This is a hard requirement; candidates without an in-scope FS Poly cannot be considered.
- 7 to 14 years of professional Java development experience.
- Strong, demonstrable experience designing and implementing RESTful interfaces. This is a must-have, not a nice-to-have.
- Experience with modern Java frameworks and build tooling.
- Experience integrating with external systems and data sources through service interfaces.
- Ability to write maintainable, tested code and clear technical documentation.

Desired

- Experience with Spring or Spring Boot, containerization, and CI/CD pipelines.
- Experience working in an agile delivery team on a government program.

Technology On Time, Inc. is a minority-owned small business delivering cleared engineering, software, and geospatial talent to the Intelligence Community and Department of Defense. To apply, send a current resume to info@techontime.com. TnT is an Equal Opportunity Employer; all qualified applicants receive consideration without regard to any legally protected status.
